

Berkshire Hathaway Energy's core principle of Environmental RESPECT recognizes the importance of minimizing the impacts our operations have on the environment, and we are striving to achieve net zero greenhouse gas emissions in a manner our customers can afford, our regulators will allow and technology advances support.

Green Financing Impact Report

(\$ in millions)

Project	Type	State	MWs	In Service	Capital Cost	Use of Proceeds (Coupon/Maturity)				Generation (GWh) ⁽¹⁾				Avoided CO ₂ (thousands of metric tons) ^(1,2)			
						2.90% 2052	5.35% 2053	5.50% 2054	Total	Pre-2022	2022	2023	Total	Pre-2022	2022	2023	Total
Various ⁽³⁾	Repowering	Various	1,158	Various	\$1,330	\$406.1	\$59.5	\$54.8	\$520.4	7,232	3,526	3,124	13,882	4,764	2,156	2,075	8,996

Footnotes

¹ Generation and Avoided CO₂ is 100% of each project

² Avoided CO₂ based on the EPA's Avoided Emissions and Generation Tool (AVERT) v4.3 data released April 2024 and are specific to onshore wind generation in the Northwest in the year of generation

AVERT avoided emission rate data retrieved from: <https://www.epa.gov/avert/avoided-emission-generated-avert>

³ 100% of generation. The share of production for repowering only has not been separated from the rest of the facility, since the energy delivered to the network solely from repowering cannot be separated and is measured from the date the last turbine was placed in service

⁴ Electric Transmission project built to facilitate the interconnection of renewable generation
