

JUST THE **FACTS**

NV ENERGY, INC.

SERVICE AREA	45,700 square miles
ELECTRIC CUSTOMERS SERVED	1.37 million
NATURAL GAS CUSTOMERS SERVED	181,400
OWNED AND CONTRACTED GENERATION CAPACITY	11,207.6 megawatts
OWNED AND CONTRACTED RENEWABLE AND NONCARBON GENERATION CAPACITY	5,087.6 megawatts (includes pre-commercial)

DOUGLAS A. CANNON
President and CEO

NV Energy, a regulated utility based in Las Vegas, Nevada, began serving the state in 1857 through its first predecessor company, the El Dorado Canal Company. Through another legacy company, it began serving Las Vegas in 1906 when the city was little more than a village at the end of a railroad line.

KEEPING THE LIGHTS ON

- The company serves approximately 90% of Nevada with electricity – keeping the lights on for more than 3.1 million citizens, as well as a state tourist population that typically exceeds 56 million annually. NV Energy also provides natural gas service to more than 183,000 customers in the Reno-Sparks area.
- NV Energy implemented the first project in Nevada to use covered conductor on mainline distribution, replacing bare line. Covered conductor is better able to withstand the impacts of high winds, blowing debris and heavy snow.

> CONTINUED ON BACK

- Since 2018, NV Energy has brought forward 14 projects totaling 3,200 megawatts of solar generation with more than 1,500 megawatts of integrated battery storage systems.
- NV Energy is awaiting approval of its plan that supports the growing number of electric vehicles by providing more charging infrastructure programs, as well as unique programs for low-income and historically underserved communities.

COMMITTED TO ITS COMMUNITIES

- In 2022, the company, its employees and the NV Energy Foundation gave more than \$4.7 million through financial and in-kind donations, including more than 22,000 volunteer hours to Nevada nonprofit organizations.
- More than 80% of the annual donations were made to organizations serving diverse communities in the categories of race and ethnicity, gender and gender identity, military and veteran status, disability status, LGBTQ and age.

DEDICATED TO CUSTOMER SERVICE

- PowerShift by NV Energy provides products and services to help customers save energy and money. These include free in-home energy assessments, free smart thermostats, free energy-efficient appliances for eligible customers and incentives for businesses to install energy-efficient lighting and other equipment.
- Customers can access a variety of online tools through MyAccount on [nvenergy.com](https://www.nvenergy.com) including bill-to-date, weekly alerts and an online energy assessment that allows them to monitor and take control of their energy consumption. A mobile app makes all of these tools available to customers while on the go.
