

# JUST THE **FACTS**

## MIDAMERICAN ENERGY COMPANY

SERVICE AREA	10,600 square miles
ELECTRIC CUSTOMERS SERVED	813,000
NATURAL GAS CUSTOMERS SERVED	789,000
OWNED AND CONTRACTED GENERATION CAPACITY	11,795 megawatts

**KELCEY A. BROWN**  
President and CEO

MidAmerican Energy Company, based in Des Moines, Iowa, meets customers' energy needs by providing safe, reliable, affordable and clean energy to customers in Iowa, Illinois, South Dakota and Nebraska.

### DELIVERING SAFE AND RELIABLE ENERGY TO MEET CUSTOMERS' NEEDS

At MidAmerican, being obsessively, relentlessly at your service also means investing in our energy infrastructure so we can provide safe and reliable service to our customers each and every day. Our companywide initiative, Safety Through Asset Reliability, or STAR, ensures we maintain and update our electric and natural gas delivery systems to meet our customers' energy needs. Our teams analyze and invest in MidAmerican systems and equipment to confirm our systems are running safely, reliably and cost-effectively. Throughout the year, we inspect and maintain our electric and natural gas distribution systems, so they deliver energy that's always there and always safe.

### GIVING BACK TO THE COMMUNITIES WE SERVE

CARES is MidAmerican's corporate citizenship program that demonstrates our community involvement and encourages employee volunteerism. Because vibrant, growing communities benefit us all, MidAmerican provides support through our time, talent and resources to help build sustainable communities. Through five key pillars of giving – Community Enhancement, Arts and Culture, Environmental Respect, Education/STEM and Safety – we work to ensure our investments have a far-reaching impact. In 2022, our employees volunteered nearly 11,000 hours, and we donated more than \$11 million through foundation, corporate and employee giving to the communities we serve.

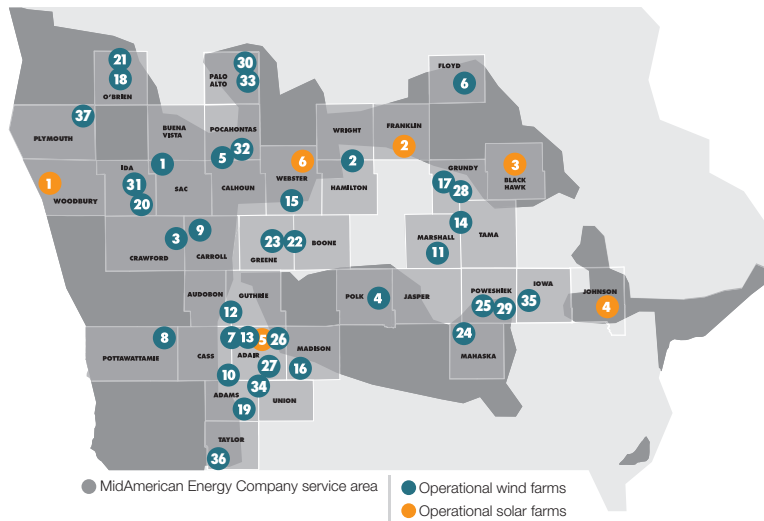

DESTINATION NET ZERO

As MidAmerican continues a steady march toward reaching our 100% renewable energy vision it set in 2014, we are setting our sights on the next milestone – net-zero greenhouse gas emissions by 2050. The roadmap to net zero is clear – MidAmerican is committed to increasing renewables, investing in transmission infrastructure, using proven technologies, and exploring new opportunities to innovate and operate our existing facilities.

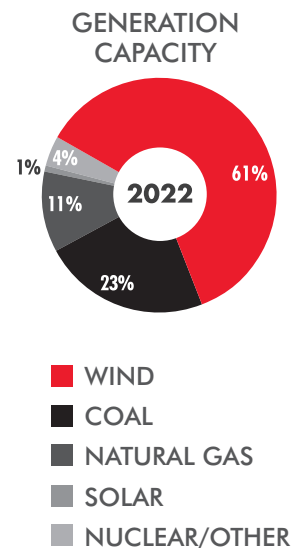

RENEWABLE ENERGY LEADER

RENEWABLE PROJECTS OWNED BY MIDAMERICAN ENERGY COMPANY

For nearly 20 years, MidAmerican has been a leader in investing in renewable energy on behalf of its customers and has more installed wind generation capacity than any other rate-regulated utility. In 2021, 88.5% of the energy MidAmerican’s Iowa customers used over the course of the year came from renewable sources.

We aren’t stopping there! MidAmerican’s proposed Wind PRIME project would add 2,042 megawatts of wind generation and 50 megawatts of solar generation. If approved, Wind PRIME will ensure MidAmerican customers in Iowa will be supplied with 100% renewable generation on an annual basis for years to come.
